

## QUALITY AND ENVIRONMENTAL INTEGRATED POLICY

PRESCAD has introduced and keeps a Quality and Environmental Management System based on the requirements from UNE-EN ISO 9001:2015: *Quality management system. Requirements* and UNE-EN ISO 14001:2015 *Environmental management system. Requirements with guidance for use*.

The Quality and Environmental Management System applies the following activities:

Design, manufacturing and commercialization of strainers, filtering systems and pressure vessels, for any kind of industry like oil&gas, petrochemical, power generation, pharmaceutical, foods and industries of processing, including technical support, setting and customizing the supplied products.

PRESCAD is aware about the need of satisfying, as far as it's feasible, every interested part through providing quality products and services that accomplishes all said requirements and being competitive at the same time. This is the reason why the management team from Prescad is committed to continuously introducing, keeping and upgrading the Quality and Environmental Management System.

This quality and environment policy is based on the following commitments:

- Continuously searching the client's satisfaction
- Strictly accomplishing the requirements given by the client, and the current legal regulation from the country in which the product or service is given that is applicable depending on the type of provided product.
- Analysing the client's requirements and adapting the product to their needs.
- Keeping a management system that guarantees a continuous upgrade of processes and relationships with interested parts through stablishing and checking periodically the quality policy and targets.
- Continuously improvement on the knowledge of the client's needs and expectations.
- Promoting the understanding and spreading of the quality and environment policy to all interested particulars through training and communication from all workers.
- Attend and evaluate improving proposals from workers.
- Continuously working on the knowledge of environment, interests and expectations of the clients and keeping the risks and opportunities System operative.
- Reducing the use of raw materials and energy, preventing pollution, managing wastes in a pertinently, making use of resources in a sustainable way and accomplishing the environmental legal requirements.

The revision of the Quality and Environmental Policy, as well as stablishing and review precise and quantified targets, is done by company management.
