

INTEGRATED QUALITY AND ENVIRONMENTAL POLICY

This Policy is established considering the internal and external context of PRESCAD, as well as the needs and expectations of relevant interested parties, ensuring its consistency with the company's strategic purpose.

PRESCAD has implemented and maintains an Integrated Quality and Environmental Management System, based on the requirements of the standards UNE-EN ISO 9001:2015 "Quality management systems. Requirements" and UNE-EN ISO 14001:2015 "Environmental management systems. Requirements with guidance for use."

The Quality and Environmental Management System of PRESCAD applies to the following activities: Design, manufacturing, and commercialization of filters, filtration equipment, and pressure vessels for all types of industries, including the Oil & Gas, petrochemical, power generation, pharmaceutical, food, and process industries, while also providing technical support and customized products tailored to the specific needs of each client.

PRESCAD is fully aware of the importance of satisfying, whenever feasible, the needs and expectations of interested parties, ensuring the delivery of high-quality products and services that strictly meet applicable requirements while maintaining market competitiveness.

Therefore, PRESCAD's Management is committed to the implementation, maintenance, and continuous improvement of the Quality and Environmental Management System, ensuring its effectiveness and actively contributing to environmental protection and sustainable development.

PRESCAD's Quality and Environmental Policy is based on the following commitments:

- To continuously seek customer and stakeholder satisfaction, ensuring that their expectations are clearly understood and effectively addressed.
- To strictly comply with the requirements established by customers, as well as with current legislation and applicable regulations in the countries where products are marketed and according to the type of product supplied.
- To analyze customer requirements and adapt products to meet their specific needs.
- To maintain a management environment focused on continuous improvement, both in internal processes and in relationships with stakeholders, through the establishment, monitoring, and periodic review of Quality and Environmental objectives and policy.
- To deepen the understanding of customers' needs and expectations, fostering long-term trust and collaboration.
- To promote understanding, implementation, and dissemination of this Policy among all interested parties through ongoing training and communication actions aimed at all personnel.
- To listen to, evaluate, and address improvement proposals made by employees, recognizing their essential role in the development and enhancement of the system.
- To work constantly on identifying and monitoring the context, as well as analyzing the interests and expectations of interested parties, maintaining an active system for managing risks and opportunities.
- To protect the environment, including pollution prevention, reduction of raw material and energy consumption, responsible waste management, sustainable use of natural resources, mitigation of climate change effects, and promotion of sustainable development, always complying with applicable environmental legislation and other relevant requirements.

Date: 24/10/2025

The review of this Policy, as well as the establishment and evaluation of specific and measurable objectives, is carried out within the framework of management reviews, ensuring its suitability, effectiveness, and continuous improvement.

This Quality and Environmental Policy is communicated, understood, and applied at all levels of the organization and is made available to the public and interested parties through the means that PRESCAD deems appropriate.
